

## Release Operations

**Integrated management and optimization** of all **approval, testing, and certification processes** for lubricants and operating fluids across the entire value chain.

### Basic idea / Objectives

Efficiency – Transparency – Complex approval processes – Regulatory compliance

### Challenges

Regulatory pressure – Documentation effort – International structures – Process complexity

### Functionalities & Services

**Workflow simplification – Integrated data management – Quality & contract monitoring – Certificate administration**

### Benefits

- ✓ More transparency
- ✓ Less complexity
- ✓ Operational Support
- ✓ Faster approvals
